INTERNATIONAL JOURNAL OF

Biological Macromolecules

STRUCTURE, FUNCTION AND INTERACTIONS

Index to Volume 16 (1994)

Number 1 (February) 1–56
Number 2 (April) 57–112
Number 3 (June) 113–168
Number 4 (August) 169–224
Number 5 (October) 225–280
Number 6 (December) 281–360

Article index

Number 1/February

Close mutual contacts of the amino groups in DNA
J. Šponer and J. Kypr 3
Onset of the fully extended conformation in (αMe)Leu derivatives and short peptides
C. Toniolo, M. Pantano, F. Formaggio, M. Crisma, G. M. Bonora, A. Aubry, D. Bayeul, A. Dautant, W. H. J. Boesten, H. E. Schoemaker and J. Kamphuis 7
A study of enzymic degradation of a macromolecular substrate, poly[N^5-(2-hydroxyethyl)-L-glutamine], by gel permeation chromatography and kinetic modelling
J. Pytela, J. Jakeš and F. Rypáček 15
Heparin binding to monodisperse plasma fibronectin induces aggregation without large-scale changes in conformation in solution
L. Vuillard, D. J. S. Hulmes, I. F. Purdom and A. Miller 21
Collagen organization in an oriented fibrous capsule
B. Brodsky and J. A. M. Ramshaw 27
Viscometric study of human, bovine, equine and ovine haemoglobin in aqueous solution
K. Monkos 31
Limited proteolysis of β-lactoglobulin using thermolysin. Effects of calcium on the outcome of proteolysis
E. Dufour, M. Dalgalarrondo and T. Haertlé 37
Enzymatic degradation of chitins and partially deacetylated chitins
Y. Shigemasa, K. Saito, H. Sashiwa and H. Saimoto 43

Number 2/April

Nuclear magnetic resonance relaxation studies of poly(hydroxybutyrate) in whole cells and in artificial granules
G. L. Shaw, M. K. Melby, D. M. Horowitz, J. Keeler and J. K. M. Sanders 59
Solution properties of the capsular polysaccharide produced by *Klebsiella pneumoniae* K40
A. Flaibani, S. Leonhartsberger, L. Navarini, P. Cescutti and S. Paoletti 65
Temperature and salt optimization of κ-carrageenan fractionation by DEAE-cellulose
N. Caram-Lelham, R. L. Cleland and L.-O. Sundelöf 71
Determination of binding affinities of glucose oxidase for sodium n-dodecyl sulfate
M. R. Housaindokht and A. A. Moosavi-Movahedi 77
Cross-linking and insolubilization studies of water-soluble poly(L-ornithine)
H. Yamamoto, Y. Hirata and H. Tanisho 81
Physical adsorption of immunoglobulin G on gold studied by scanning tunnelling microscopy
H. X. You, D. M. Disley, D. C. Cullen and C. R. Lowe 87
Structure of the 'corallinans' – sulfated xylogalactans from *Corallina officinalis*
M. R. Cases, C. A. Stortz and A. S. Cerezo 93
Microbial synthesis and properties of poly(3-hydroxybutyrate-co-4-hydroxybutyrate) in *Comamonas acidvorans*
Y. Saito and Y. Doi 99
Synergy of the κ-carrageenan–carob galactomannan blend inferred from rheological studies
T. Turquois, J.-L. Doublier, F.-R. Taravel and C. Rochas 105

Number 3/June

Biosynthesis from gluconate of a random copolyester consisting of 3-hydroxybutyrate and medium-chain-length 3-hydroxyalkanoates by *Pseudomonas* sp. 61-3
H. Abe, Y. Doi, T. Fukushima and H. Eya 115
Depolymerization reactions of hyaluronic acid in solution
M. Reháková, D. Bakoš, M. Soldán and K. Vizárová 121
Shear modulus–temperature meltdown profiles of gelatin and pectin gels. A cascade theory description
A. H. Clark, K. T. Evans and D. B. Farrer 125
Study on the thermal stability of α-amylase modified by maleic anhydride copolymer

0141-8130/94/060355–05
© 1994 Butterworth-Heinemann Limited

M. Briššová, J. Augustín and M. Simonetti 131
Rheological study on mixtures of different molecular weight hyaluronates
N. Berriaud, M. Milas and M. Rinaudo 137
Conformational changes in the cyclic undecapeptide cyclosporin induced by interaction with metal ions. An FTIR study
R. A. Shaw, H. H. Mantsch and B. Z. Chowdhry 143
Viscosity and flow properties of concentrated solutions of chitosan with different degrees of deacetylation
W. Wang and D. Xu 149
The non-enzymatic specific amino-acylation of transfer RNA at high pressure
A. Krzyżaniak, J. Barciszewski, P. Salański and J. Jurczak 153
A–Z-RNA conformational changes effected by high pressure
A. Krzyżaniak, J. Barciszewski, J. P. Fürste, R. Bald, V. A. Erdmann, P. Salański and J. Jurczak 159
Study of the CN1 peptide of P2 protein using Fourier transform infra-red spectroscopy
B. H. Stuart and E. F. McFarlane 163

Number 4/August

Refolding of RNase A at high concentrations: identification of non-native species
T. K. Suresh Kumar, K. Gopalakrishna, T. Ramakrishna and M. W. Pandit 171
Solubility and structure of *N*-carboxymethylchitosan
R. A. A. Muzzarelli, P. Ilari and M. Petrarulo 177
Elucidation of pK_a values for Ca^{2+} binding sites in calmodulin by spectrofluorometry
B. Farzami, A. A. Moosavi-Movahedi and G. A. Naderi 181
Conformations and stabilities of human Glu_1- and Lys_{78}-plasminogen and of the fragments mini- and microplasminogen, analysed by circular dichroism and differential scanning calorimetry
R. Misselwitz, K. Welfle and H. Welfle 187
Structure factor calculations for a side-by-side model of B-DNA
S. R. Hubbard, R. J. Greenall, A. K. Shrive, V. T. Forsyth and A. Mahendrasingam 195
Single crystals of V amylose complexed with n-butanol or n-pentanol: structural features and properties
W. Helbert and H. Chanzy 207
Modification of crystallinity and crystalline structure of *Acetobacter xylinum* cellulose in the presence of water-soluble β-1,4-linked polysaccharides: ^{13}C-NMR evidence
J. M. Hackney, R. H. Atalla and D. L. VanderHart 215

Number 5/October

^1H- and ^{19}F-NMR approaches to the study of the structure of proteins larger than 25 kDa
P. G. W. Gettins 227
Interactions of hyaluronan (hyaluronic acid) with phospholipids as determined by gel permeation chromatography, multi-angle laser-light-scattering photometry and ^1H-NMR spectroscopy
P. Ghosh, N. Hutadilok, N. Adam and A. Lentini 237
Endocytosis, partial degradation and release of heparan sulfate by elicited mouse peritoneal macrophages
M. Thomson 245
Influence of the method of purification on some solution properties of welan gum
L. Lopes, M. Milas and M. Rinaudo 253
Conformation of a T-cell stimulating peptide of interleukin-1β protein: circular dichroism studies
M. Z. Siddiqui, A. K. Sharma, S. Kumar, A. Kumar and P. N. Bhat 259
γ-Poly(glutamic acid) formation by *Bacillus licheniformis* 9945a: physiological and biochemical studies
G. A. Birrer, A.-M. Cromwick and R. A. Gross 265
Vibrational Raman optical activity of glycoproteins
A. F. Bell, S. J. Ford, L. Hecht, G. Wilson and L. D. Barron 277
A new sulfated polysaccharide with potent blood anti-coagulant activity from the red seaweed *Grateloupia indica*
A. K. Sen Sr, A. K. Das, N. Banerji, A. K. Siddhanta, K. H. Mody, B. K. Ramavat, V. D. Chauhan, J. R. Vedasiromoni and D. K. Ganguly 279

Number 6/December

Molecular mechanisms and genetics of hyaluronan biosynthesis
M. O'Regan, I. Martini, F. Crescenzi, C. De Luca and M. Lansing 283
Genetic analysis of the acetan biosynthetic pathway in *Acetobacter xylinum*
A. M. Griffin, V. J. Morris and M. J. Gasson 287
Visualization of capsule formation by *Erwinia amylovora* and assays to determine amylovoran synthesis
P. Bellemann, S. Bereswill, S. Berger and K. Geider 290
Biosynthesis of a novel polysaccharide by *Acetobacter xylinum*
A. Shirai, M. Takahashi, H. Kaneko, S.-I. Nishimura, M. Ogawa, N. Nishi and S. Tokura 297
Physicochemical properties of extracellular (1→4)-β-D-glucuronan produced by the *Rhizobium meliloti* M5N1CS strain during fermentation: evidence of degradation by an exoenzyme activated by Mg^{2+}
P. Michaud, J. Courtois, B. Courtois, A. Heyraud, P. Colin-Morel, J. P. Seguin and J. N. Barbotin 301
Extracellular polysaccharide of *Erwinia chrysanthemi* Ech6
B. Y. Yang, J. S. S. Gray and R. Montgomery 306
Conformation of (2→1)-β-D-fructan in aqueous solution
S. Kitamura, T. Hirano, K. Takeo, M. Mimura, K. Kajiwara, B. T. Stokke and T. Harada 313
Hydrodynamic characteristics and equilibrium rigidity of pullulan molecules
G. M. Pavlov, E. V. Korneeva and N. P. Yevlampieva 318
Physicochemical characterization of an acetan variant secreted by *Acetobacter xylinum* strain CR1/4
M. J. Ridout, G. J. Brownsey, V. J. Morris and P. Cairns 324
Enzymatic synthesis of trisaccharides and alkyl β-D-glucosides by the transglycosylation reaction of β-glucosidase from *Fusarium oxysporum*
P. Christakopoulos, M. K. Bhat, D. Kekos and B. J. Macris 331
Isolation of four major subunits from *Clostridium thermocellum* cellulosome and their synergism in the hydrolysis of crystalline cellulose
S. Bhat, P. W. Goodenough, M. K. Bhat and E. Owen 335
Formation, derivatization and applications of bacterial cellulose
U. Geyer, Th. Heinze, A. Stein, D. Klemm, S. Marsch and H.-P. Schmauder 343
Partition of polysaccharide-coated liposomes in aqueous two-phase systems
E.-C. Kang, K. Akiyoshi and J. Sunamoto 348

Structure of single crystals
Amylose, Electron diffraction, 207
Sulfated galactan
Anticoagulant activity, *Grateloupia indica,* 279
Synergism
Dissociation, Separation, 335

Thermal unfolding
Human serum protein, Limited proteolysis, 187
Thermo-inactivation
α amylase, Maleic anhydride copolymer, 131
Thermolysin
β-lactoglobulin, Calcium, 37
Three-dimensional structure
RNase A, Refolding, 171
Tranglycosylation
β-glucosidase, *Fusarium oxysporium,* 331
tRNA aminoacetylation
High pressure, RNA conformation changes, 153

Vibrational optical activity
Raman optical activity, Glycoprotein conformation, 277
Viscosity
Huggins coefficient, Mark–Houvink exponent, 31
Hyaluronates, Polydispersity, 137
Chitosan, Degree of deactylation, 149

Water insolubilization
Polyornithine, Organic cross-linking agents, 81
Welan gum
Polysaccharide, Aggregates, 253

X-ray diffraction
C^{α}-methylleucine, Peptide conformation, 7
X-ray fibre diffraction
DNA double helical model, DNA side-by-side model, 195
Xylogalactans
Corallina officinalis, Ethylation, 93

(2→1)-β-D-fructan
Globular conformation, Small angle X-ray scattering, 313

α amylase
Thermo-inactivation, Maleic anhydride copolymer, 131

β-glucosidase
Tranglycosylation, *Fusarium oxysporium,* 331

γ-poly(glutamate)
Bacillus licheniformis 9945a, Gel permeation chromatography, 265
